

ADHAVAN P

GAME DESIGNER

+91 8072647909

ADHAVANPRABHU906@GMAIL.COM

Portfolio

SKILLS

- Environment Design
- Gameplay Mechanics
- UI/UX Basics for Games
- Level Blocking & Prototyping
- Set Dressing & Composition
- Basic Lighting & Color Theory
- 3D Modelling

TOOLS

- Unreal Engine
- Maya
- Blender
- Figma
- Diversion
- Sheets

EDUCATION

Diploma in Game Design

2025 - 2026

Bachelor of Computer Application

2018 – 2021

PROFILE

Detail-oriented Game Designer with a background in computer applications and hands-on expertise in Unreal Engine, 3D modeling and Adobe Creative Suite. Proven ability to translate creative concepts into playable prototypes and atmospheric environments with a strong focus on player engagement and technical efficiency. Adept at leveraging structured design frameworks, user-centric playtesting, and AI-assisted workflows to deliver immersive gameplay experiences.

EXPERIENCE

Lycus Studios

2026 – Present

Junior Game Designer

- Designed, balanced, and implemented core gameplay systems and features directly within Unreal Engine, translating high-level design concepts into playable mechanics.
- Collaborated with engineering teams to establish robust data mapping schemas, configuring data tables and spreadsheets to streamline parameter tuning, economy balancing, and system logic.
- Built interactive UI/UX wireframes, user flows, and design specifications using Figma, ensuring seamless alignment between visual design, game feel, and front-end implementation.
- Created, modified, and integrated 3D assets into Unreal Engine using Blender, optimizing meshes, draw calls, and performance pipelines using InstaLOD.
- Partnered cross-functionally across art, engineering, and production to identify pipeline bottlenecks, debug technical design issues, and maintain technical documentation.
- Design & Skills: Game Design, System Balancing, Data Mapping & Structuring, UI/UX Wireframing, 3D Asset Integration & Optimization.
